

OCA Instituto de Certificación, S.L.U.

Verifies that

ZIGOR CORPORACIÓN, S.A.

has carried out the quantification of emissions of greenhouse gases in accordance with the requirements of:

UNE-EN ISO 14064-1:2019

for the activity of:

Power electronic equipment and systems and services related to electric energy conditioning and conversion and storage both in DC and AC, low and medium voltage for the supply of electrical energy to elements of the transmission and/or distribution network, improvement of the quality of the electrical supply to industrial or commercial consumers, the supply of electrical energy of photovoltaic origin to the network or to industrial, commercial consumers, energy communities, either through isolated microgrids or connected to the electrical grid, the storage of electrical energy to provide grid regulation services or for economic optimization of energy generation, charging of electric vehicles or any other application in which conversion or conditioning of electrical energy either in low voltage or medium voltage for distribution and/or consumption is needed and turnkey projects for any of the above applications.

carried out in the following work centers:

C/ Portal de Gamarra, 28. 01013 Vitoria (Álava)

ORGANIZATIONAL CARBON FOOTPRINT CALCULATED FOR THE PERIOD 2022

Total GHG emissions in 2022: 11,973.33 tons of CO2 eq divided as follows:

SCOPE 1:

Category 1: Direct GHG emissions and removals: 116.72 Tn CO2 eq.

SCOPE 2:

Category 2: Indirect GHG emissions caused by imported energy: 0 Tn CO2 eq.

SCOPE 3: 11,856.61 Tn CO2 eq distributed in:

Category 3: Indirect GHG emissions caused by transportation: 10,057.27 Tn CO2 eq.

Category 4: Indirect GHG emissions caused by products used by the organization: 1,263.63 Tn CO2 eq.

Category 5: Indirect GHG emissions associated with the use of the organization's products: 535.71 Tn CO2 eq.

Certificate nº 34/5405/24/02096

Initial certification date: 2024/02/22

Issue date: 2024/02/22
